

The blocks used as steps capped with square pavers

### Stepping up towards new heights

Stairways represent an invitation to go up – or down. They may take you to a lower level or help you reach new heights. For us at Terraforce these stairways represent mostly the way up. It has been and continues to be a good year. Setbacks that did occur have only spurred us to work harder and to be more efficient. The rewards have been better than ever for all parties involved, our licensees, the recommended installers and our clients. During 2008 we have broadened our base considerably with new licensees and have won a number of new awards as well as many positive media reports for our pioneering and environmentally sound projects.

To celebrate the way up, here are a few examples of stairways, built during the year 2008 and with that we wish you all a prosperous and healthy new year of 2009.
